

**New 6.5' VersiGard® Reinforced EPDM**  
**September 8, 2014**

**To: Versico Authorized Contractors**

Versico Roofing Systems is pleased to introduce its new 6.5' VersiGard Reinforced EPDM, ideal for projects requiring FM 1-90 ratings. When Versico's 6.5'- wide sheets are used in conjunction with HPV Fasteners and 2" Polymer Seam Plates at 6" on center or HPV-XL Fasteners and HPV-XL 2 3/8" plates at 12" on center, the system qualifies for an FM 1-90 rating over a grade C steel deck.

The easy maneuverability of the new 6.5' sheets makes them ideal for smaller, cut-up projects, and the packaging (two rolls per core) reduces roof loading time and minimizes construction waste on larger, more wide-open projects.

Versico's 6.5' VersiGard Reinforced EPDM rolls feature factory-applied 6" Quick-Applied Tape (QAT), which delivers value to contractors and building owners by improving the speed and quality of EPDM seam applications.

Part Number	Description	Roll Size
323894	45-mil Rein 2-pack	6.5' x 100' w/ 6" QAT
323895	60-mil Rein 2-pack	6.5' x 100' w/ 6" QAT

Versico continues to lead the conversion of the market to labor-saving VersiGard EPDM with Quick-Applied Tape, as it improves workmanship and enhances the overall value of a VersiGard EPDM roofing system.

If you have any questions or for more information, please contact your Versico Independent Sales Representative.

Sincerely,

Ronald L. Goodman  
EPDM Marketing Manager
