

VersiFlex™ Inside and Outside Corners
March 24, 2017

To: Versico Authorized Contractors

Versico Roofing Systems is pleased to announce updates to its VersiFlex Inside and Outside Corners. These products are now white/gray and white/tan so that if material is left over from a gray or tan job, it can also be used on white jobs. Both sides of Versico's VersiFlex PVC Inside and Outside Corners are manufactured using KEE HP top-ply formulation for enhanced weatherability and performance at critical transition areas and edge details.

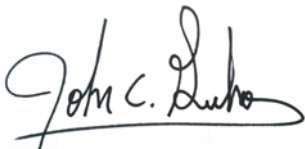

New product code	New description	Packaging	Stocking locations
329284	INSIDE CORNERS - WHITE/GRAY	12/carton	C, G, T
329285	INSIDE CORNERS - WHITE/TAN	12/carton	C, G, T
329286	OUTSIDE CORNERS - WHITE/GRAY	12/carton	C, G, T
329287	OUTSIDE CORNERS - WHITE/TAN	12/carton	C, G, T

C – Versico, G – Greenville, T- Tooele

Manufactured from non-reinforced membrane, Versico's PVC Inside and Outside Corners are quick and easy to install, form easily to out-of-square corners, and enhance aesthetics on completed installations.

If you have any questions, or for more information, please contact your Versico independent sales representative or distributor.

Sincerely,

John C. Greko
PVC Product Manager
