

SecurShield HD Plus
March 2, 2012

To: Versico Independent Sales Representatives and Distributors

Versico is pleased to announce the introduction of SecurShield HD Plus™ to its growing line of energy-efficient commercial insulation, premium faced products. SecurShield HD Plus is a Factory Mutual approved, ½" thick high density rigid polyiso foam core panel specifically engineered for use as a coverboard in fully adhered systems that require a 1-90 uplift rating. At eight fasteners per 4'x8' board, SecurShield HD Plus is the only polyiso coverboard to achieve the FM 1-90 rating. Manufactured using premium-performance coated glass facers, SecurShield HD Plus delivers an R-value of 2.5, is easy to cut and is lightweight, all of which are significant advantages over alternative coverboard products.

SecurShield HD Plus also provides these additional outstanding benefits:

- Meets Factory Mutual 1-90 with 8 fasteners per 4'x8' board
- Manufactured in a 1/2" thickness, 4'x4' or 4'x8' boards
- Compatible with all Versico single-ply roofing systems
- R-Value = 2.5 Long Term Thermal Resistance (LTTR) value provides a 15 year time weighted average in accordance with CAN/ULC-S770
- Premium SecurShield facer provides improved resistance to high winds
- Available in 100 psi compressive strength
- Achieves FM's SH-1 severe hail rating
- Highly resistant to mold –ASTM C1338“Standard Method for Determining Fungi Resistance of Insulation Materials and Facings”
- Premium SecurShield facers provide inherent moisture resistance

At only 13 lbs. per 4'x8' board, SecurShield HD Plus is the ideal lightweight product for both new construction and re-roof applications that require a Factory Mutual 1-90 coverboard.

Should you have any questions regarding the specification, uses or application of this new product, please contact your Versico Regional Manager.

Sincerely,

Edward R. Krusec
