

**20" Quick-Applied Cured Flashing**  
July 14, 2017

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce its 20" Quick-Applied Cured Flashing. Featuring a monolithic 20 inches of VersiGard® EPDM Quick-Applied Seam Tape, this labor-saving accessory can be used to complete a variety of curb and pipe flashing details. 20" Quick-Applied Cured Flashing will replace Versico's 20" Fully Quick-Applied Curb Flashing, which has been discontinued.

Versico 20" Quick-Applied Cured Flashing	
Product Code	326491 (previously 315839)
Stocking Location	Carlisle, PA and Greenville, IL
Packaging	1 roll per carton
Storage Requirements	Store between 60-90°F (15-32°C)
Product Notes	Cured, 60-mil VersiGard EPDM with 30-mil Quick-Applied Seam Tape 1-year shelf life Coat curbs covered with Polyiso insulation with EPDM Primer Poly release film is slit 6" in from the edge Weight per carton is 50 lbs

Using 20" Quick-Applied Cured Flashing significantly improves the ease of completing the EPDM target splice under the Quick-Applied EPDM Pipe Boot when installing 30-year systems. Simply clean and prime the deck membrane, cut the 20" flashing to length, peel the release liner, stick the flashing in place, roll, and seal the edges with Lap Sealant. 20" Quick-Applied Cured Flashing is also ideal for use as a target splice when installing [VGMA-8.1](#) and [VGMA-8.2](#) pipe details on mechanically attached roof systems. Additional membrane securement required around pipes can now be overlaid with a single piece of flashing instead of four individual pieces.

If you have any questions, or for more information, please contact your local independent sales representative.

Sincerely,

Ronald L. Goodman  
EPDM Marketing Manager
