

**Non-Halogenated Flame-Retardant Polyiso Insulation
November 8, 2017**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce its VersiCore MP-H® NH and SecurShield® NH Polyiso insulations. These products provide the same performance characteristics as standard polyiso products but contain no halogenated flame retardants. VersiCore MP-H NH and SecurShield NH offer a variety of additional benefits, including:

- Living Building Challenge "Red List Free" with Declare label and product database listing
- Zero halogenated flame retardants
- Can contribute toward LEED® v4 credit requirements
- Living Building Challenge compatible
- California Department of Public Health (CDPH) VOC emissions compliant
- Same performance characteristics as standard VersiCore MP-H and SecurShield Polyiso products

Description	Thicknesses	Manufacturing Location	Lead Time	Minimum Order Quantity
VersiCore MP-H NH Polyiso	0.5" – 4.5"	Montgomery, NY	2 weeks	1 truckload
SecurShield NH Polyiso	0.5" – 4.5"	Montgomery, NY	2 weeks	1 truckload

VersiCore MP-H NH and SecurShield NH are made-to-order products; upcharges, lead times, and minimum order quantities will apply. As demand requires, additional manufacturing locations will be brought online and more products will be made available.

If you have any questions, or for more information, please contact your independent sales representative.

Sincerely,

Chad Buhrman
CCM Insulation Product Manager
