## **Certified Fabricated Accessories**

For years the name Versico has stood for quality and innovation in the single-ply roofing community. Therefore, every product and service that Versico offers must meet the extremely high standards that the roofing community has come to expect from an industry-leader. In recognition of these requirements Versico is proud to announce the introduction of the Certified Fabricated Accessory Program.

In the months to follow all of Versico's TPO and PVC accessory product labels, as well as many of the accessories themselves, will be marked with Versico's Certified Fabricated Accessory stamp of approval. This certification is confirmation to our applicators and building owners that the accessories installed on their project have been manufactured to the highest level of quality and that they meet the requirements to be labeled as a Versico product.

Only Versico's Certified Fabricated Accessories will be accepted on warranted projects. However, TPO and PVC details field-fabricated by a Versico Approved Contractor with Versico products will continue to be accepted as well.

Sincerely

A handwritten signature in black ink, appearing to read "David French".
