

**Reintroduction of Versico Quick-Applied EPDM Overlayment Strip  
September 10, 2018**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to reintroduce Quick-Applied (QA) EPDM Overlayment Strip to its product lineup. This 70-mil-thick product consists of a 40-mil semi-cured EPDM laminated to a 30-mil fully cured, synthetic rubber-based, pressure-sensitive adhesive. QA EPDM Overlayment Strip is ideal for stripping in gravel stops, metal edging, drip edges, end laps, and Versico Seam Fastening Plates.

Product benefits include quicker installations and increased labor savings due to the fact that T-Joint Covers are not required when QA EPDM Overlayment Strip is used as a stripping for 45-mil and 60-mil membrane seams and metal edging.

<b>Product Code</b>	<b>Product Description</b>	<b>Stocking Locations</b>	<b>Weight</b>	<b>Package Quantity</b>
