

**Plaza Paver Vendor Addition to Service Western States  
October 15, 2019**

**To: Versico Authorized Contractors**

Versico Roofing Systems is pleased to announce the addition of the Westile® Western Plaza Paver™ Series to its product lineup. Western Plaza Pavers are available exclusively for projects located in the western United States, including the following states:

- Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming

Because they are manufactured within the western region, Westile's Western Series Plaza Pavers will allow Versico to be much more competitive for projects in those markets by reducing shipping costs.

With the ever-increasing demand for rooftop amenity space, it is important that Versico's product offering meets customers' needs. Versico offers a full line of Roof Garden and Plaza Paver products to meet virtually any roof design. As a reminder, if the building owner wishes to obtain a Versico Total System Warranty, all Roof Garden and Plaza Paver components must be purchased through and supplied by Versico.

For more information about Westile Western Plaza Pavers, contact your Versico independent sales representative.

Regards,

Chris Kann
