

New VersiGard® QAT Single-Packs
June 17, 2013

To: Versico Authorized Contractors

Versico Roofing Systems is pleased to announce the introduction of four new single-pack VersiGard Quick-Applied Tape (QAT) EPDM membrane options.

VersiGard QAT continues to deliver value to the contractor and building owner by improving both the speed and quality of EPDM seam application.

The new single-pack rolls are most commonly used for smaller, cut-up projects while the two packs continue to be a benefit on larger, more wide-open projects.

Part Number	Description	Size
322412	60-mil non-reinforced	10' x 100' w/ 3" tape
322413	60-mil non-reinforced	10' x 50' w/ 3" tape
322414	60-mil reinforced	10' x 100' w/ 6" tape
322415	60-mil white non-reinforced	10' x 100' w/ 3" tape

As a result of these additional offerings, Versico will be phasing out part # 307428 (60-mil non reinforced 10' x 50' two packs), since the 10' x 50' single packs are better suited for small projects.

We continue to lead the conversion of the marketplace towards factory-applied seam tape, as it is one of the major performance-related breakthroughs that have further enhanced the value of an EPDM roofing system.

If you should have any questions, please contact your Versico Independent Sales Representative.

Sincerely,

Ronald L. Goodman
