

**20" VersiGard® EPDM White Peel & Stick Cured Flashing**  
**June 11, 2018**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce its 20" VersiGard EPDM White Peel & Stick (P&S) Cured Flashing. Featuring a monolithic 20" of White Peel & Stick Seam Tape, this labor-saving accessory can be used for a variety of curb and pipe flashing details. This new product will replace 20" P&S Curb Flashing (Product Code 309816), which has been discontinued.

<b>Versico 20" VersiGard EPDM White Peel &amp; Stick Cured Flashing</b>	
<b>Product Code</b>	332388
<b>Stocking Locations</b>	Carlisle, PA and Greenville, IL
<b>Packaging</b>	One 20" x 50' roll per carton
<b>Weight</b>	50 lbs per carton
<b>Storage Requirements</b>	Store between 60-90°F (15-32°C)
<b>Product Notes</b>	VersiGard White 60-mil cured EPDM with 30-mil White Peel & Stick Seam Tape 1-year shelf life Coat curbs with EPDM Primer prior to installation Poly release film is slit 6" in from the edge

Simply clean and prime the deck membrane and curb, cut the 20" flashing to length, peel the release liner, stick the flashing in place and roll to ensure proper adhesion. Versico's 20" White P&S Cured Flashing is also ideal for use as a target splice when installing EPDM pipe details on mechanically attached TPO roof systems; additional membrane securement around pipes can now be overlaid with a single piece of flashing instead of four individual pieces.

If you have any questions, or for more information, please contact your independent sales representative.

Sincerely,

Ronald L. Goodman
