

**Plaza Paver System Product Line Additions
November 29, 2018**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to announce its Plaza Paver product line is expanding. Versico will now offer concrete pavers from Sunny Brook Pressed Concrete and a variety of accessories from MRP Supports, including adjustable and fixed-height supports and EPDM pedestals.

With the ever-increasing demand for rooftop amenity space, it is important that Versico's paver product offering meet customers' needs. Collaborating with Sunnybrook and MRP will enhance Versico's total-systems strategy by providing industry-leading, single-source overburden system solutions through one channel.

As a reminder, Versico offers a full line of Roof Garden and Plaza Paver products to meet virtually any roof design. If the building owner wishes to obtain a Versico Total System Warranty, all Roof Garden components and Plaza Pavers must be supplied by Versico.

For more information about the additions to Versico's Plaza Paver product line, consult the technical data bulletins or contact your independent sales representative.

Regards,

Alex Drescher
Roof Garden Product Manager
